

# MATH ACTIVITY

## Fork Painted Shape Monster

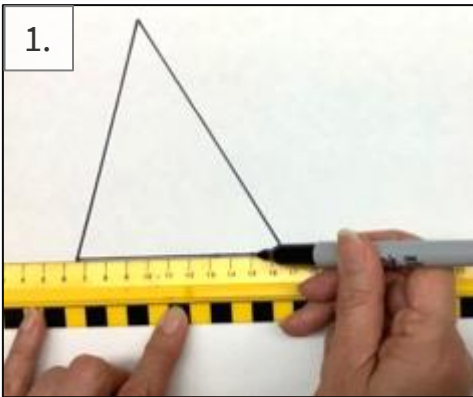

By Eunice & Tamara

### What you need:

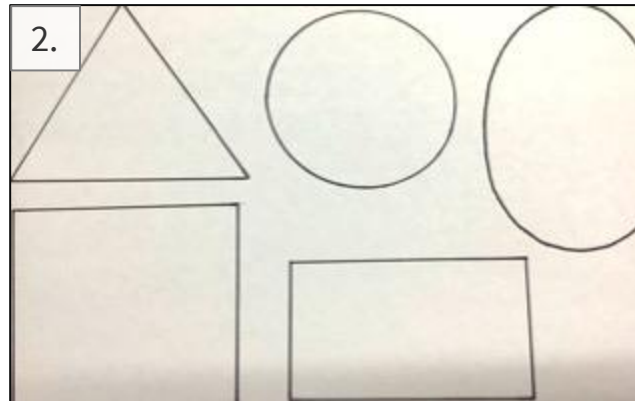

- Fork
- Acrylic paint, assorted colors
- Googly eyes, varying sizes
- Black sharpie

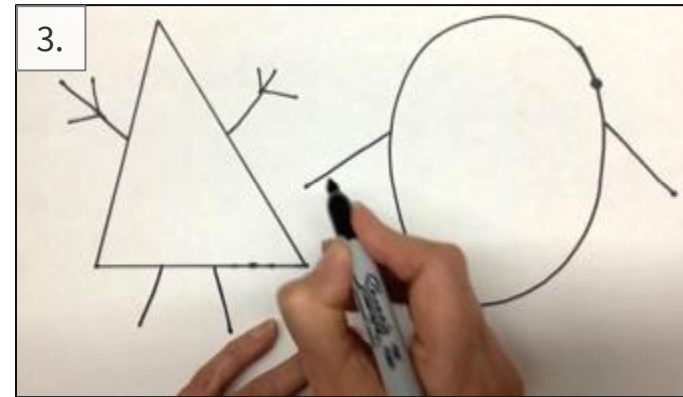

### Steps:

1.

2.

3.

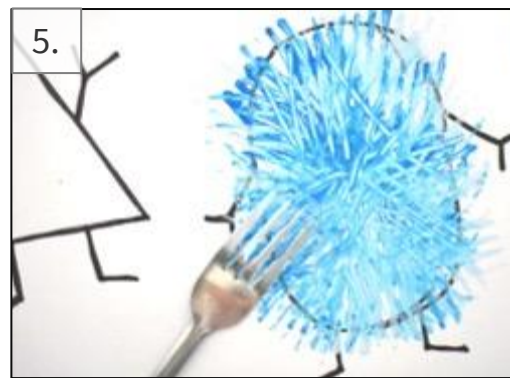

1. Create squares, circles, triangles, diamonds with a pen or marker.

2. Talk about the shapes with your children: What shapes are they? What do they look like?

3. Make a simple set of arms and legs.

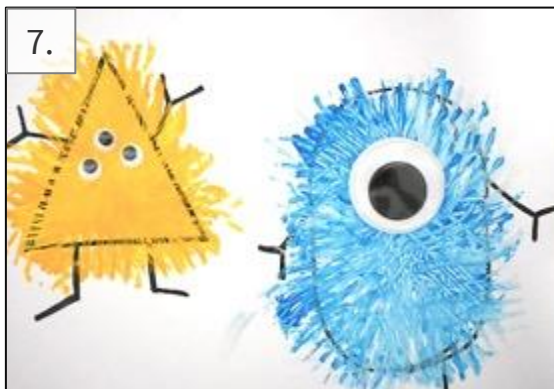

4 Use the tines of the fork on the paint to make a furry look.

5. By dipping the fork in a squirt of paint, you can make a monster.

6. Draw a monster mouth on another sheet of white cardstock. Make the lines thick enough to cut out.

7. Glue a googly eye in place. Large eyes, multiple smaller eyes, whatever your monster has going on. Glue on the monster's mouth as well.

You can try to:

Learn and practice recognizing shapes through this fun activity!

Ex. Circle monster, triangle monster.
