

Painting with bubbles

Steps:

What you need:

- Cups
- Bubble Solution
- Food Colouring
- Bubble Wands
- Paper
- Baking Pan

1, 2, 3, 4. Pour some bubble solution into each of the cups, then put a couple drops of different coloured food colouring into each cup. Stir the bubble solution to mix in the colour, using a different bubble wand for each one.

5. Place a white paper on the baking pan and blow some bubbles onto it. With your child, try to blow the bubbles so that they land on the paper without popping.

6. Choose a different coloured bubble solution and try layering bubbles on top, or next to each other.

7. Try making large bubbles to place on the paper. Compare with your child about how big you can make your bubbles.

8. Once you and your child are finished with your bubble art, let it dry and look at what you've created together. Talk about where it looks like the bubbles were when you placed the paper to dry. Talk about what colours were used, and how they mixed together.
