

SENSORY ACTIVITY

Rainbow Jar

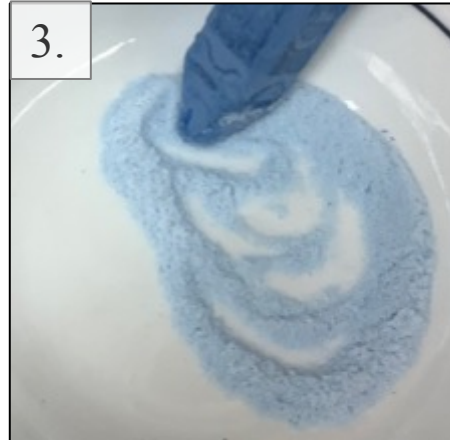

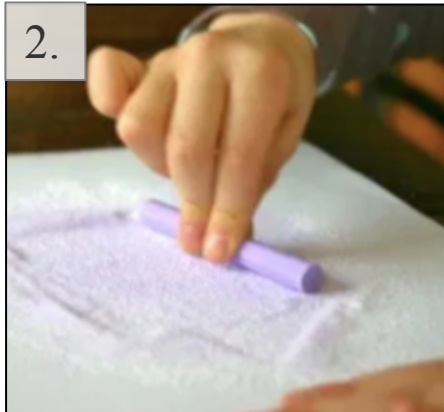

By Eunice & Tamara

☐ What you need:

- Empty Clear Container
- Sidewalk chalk
- Salt
- Small container or paper plate

☐ Steps:

1. Pour some salt onto a clean, flat surface.
2. Take a stick of sidewalk chalk and rub it against the salt, onto the surface.
3. Using the chalk, blend together the salt and the chalk powder to give the salt color.
4. Continue to rub and blend until the color of the salt is the same as the chalk.

5.

5. Repeat this with different colored sidewalk chalk. Make sure to separate each color.

6.

6. Pour in one color at a time into the empty container to create visible layers. ****BE SURE TO FILL IT TO THE TOP TO PREVENT MIXING.**

Try:

- Making different kinds of layers; instead of having simple strips, make hills and waves.
- Talking about the colors with your child.
- Feeling the texture of the salt and chalk while blending.
