

FINE MOTOR ACTIVITY

Spin Drum

Steps:

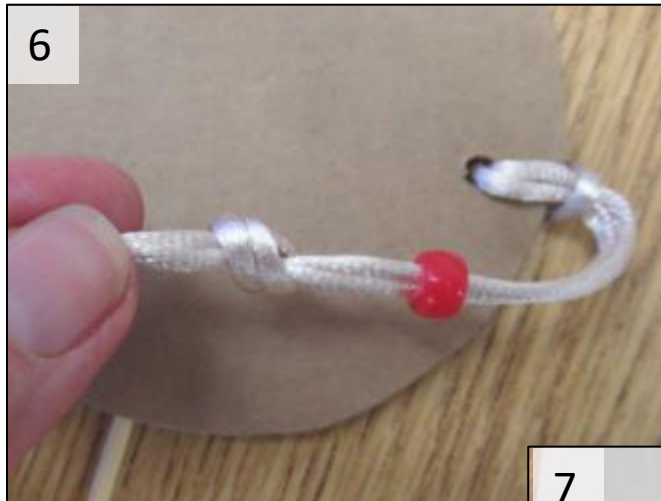

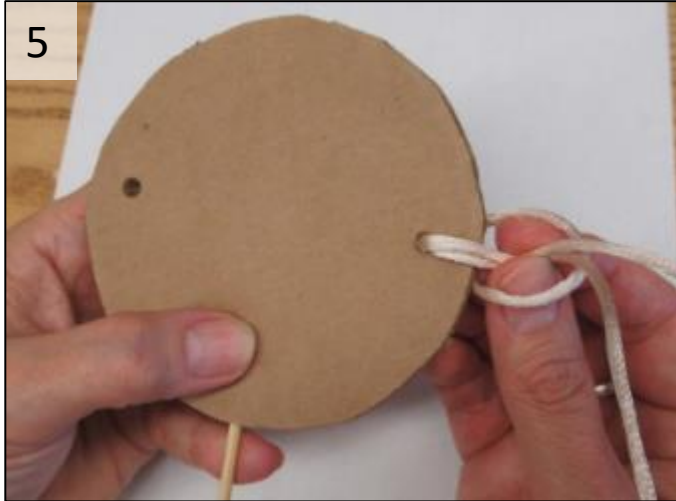

What you need :

- Cup
- Pencil
- Cardboard
- Scissors
- Wooden Skewer
- String
- 2 Beads
- Markers
- White Paper
- Glue Stick

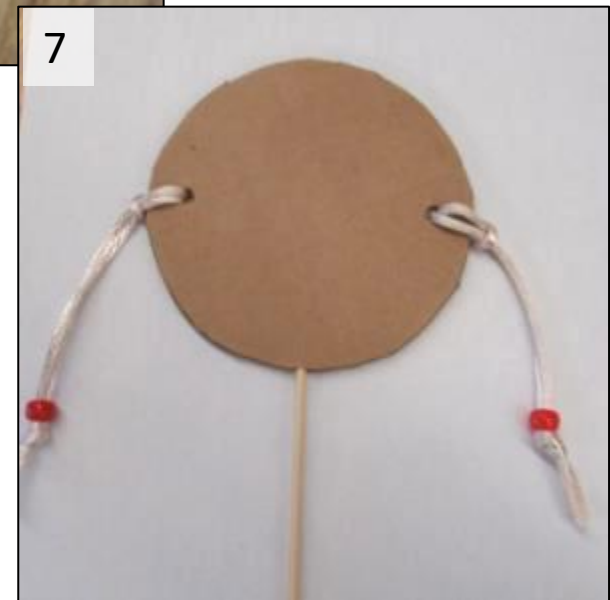

1, 2, 3, 4. Trace a circle on the cardboard using a pencil and cup. Cut out the circle with a pair of scissors and poke in the wooden skewer vertically at the bottom of the circle. Make two small holes with the scissors at opposite sides of the circle.

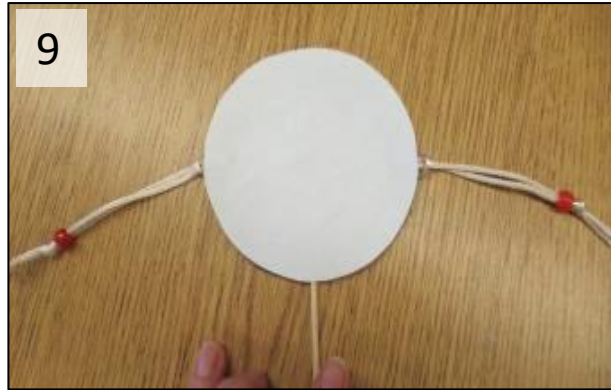

5. Pull the string through the hole, then knot it tight against the circle to keep it from loosening.

6, 7. Place a bead through the string, then tie the end to keep the bead from falling out.

** Make sure the string is the right length, so that the bead will hit the cardboard “drum”.

8, 9, 10. Cut out a circle from white paper the same size as the cardboard. Glue it onto the cardboard, and using some markers, draw on a fun face.

11, 12, 13. To play the drum, hold the skewer between your palms and rub together so that as it spins, the beads will hit the cardboard. You can also try decorating the drum in different ways with your child.
