

SENSORY ACTIVITY

Up and Down in the Bottle

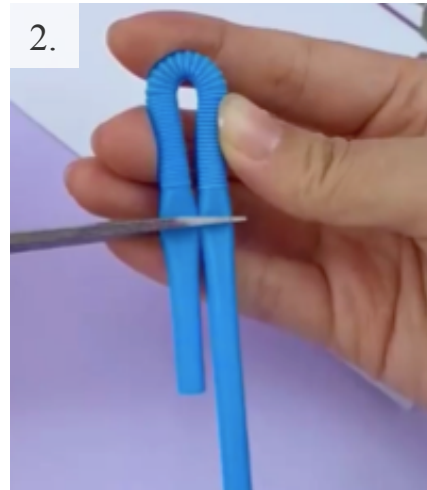

By Eunice & Tamara

What you need:

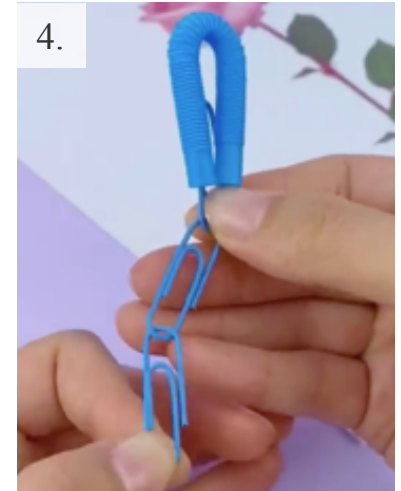

- Googly eyes
- Straws
- Clear soft plastic water bottle & water
- Paper clips
- Scissors

Steps:

1&2. Cut out the curving section of the straw.

3&4. Clip on the paper clip on one end of the straw, and continue to connect and link the clips together.

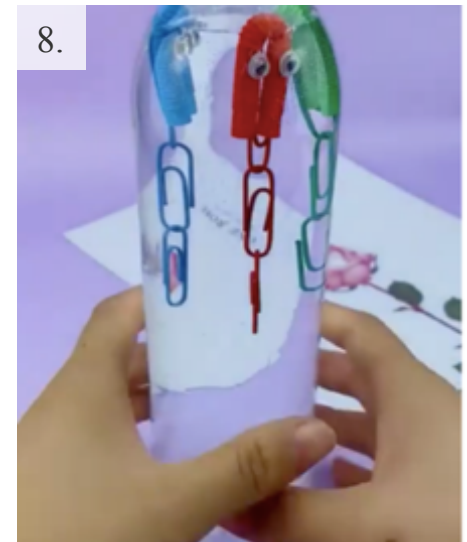

5.

6.

7.

8.

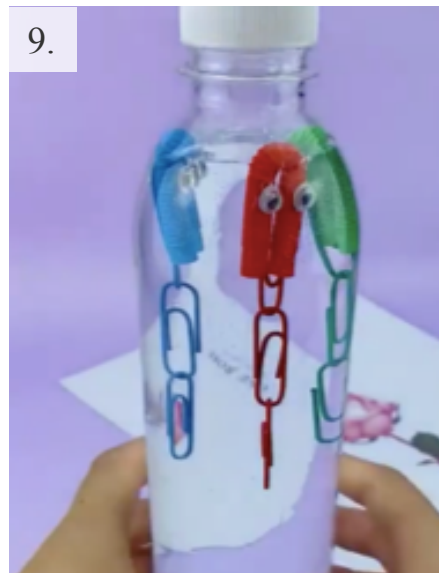

5. Glue googly eyes onto the curved part of the straw.

6&7. Make more straw and paper clip links, and place them in the water bottle. Close the bottle cap with the straw and paper clip links.

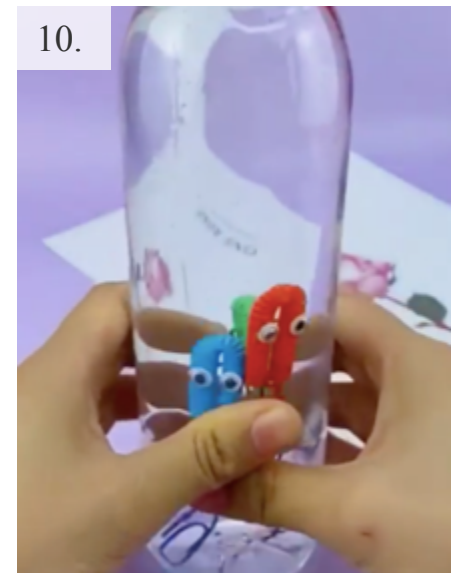

8, 9, 10. By squeezing the water bottle, you can see the straw and paper clip links sink down towards the bottom, then float back upwards.

Explore with your child:

- Talk about floating and sinking objects
- Talk about the movement of the water, and how we can see it from the movement of the links in the bottle.

9.
