

YOU DO AND I DO

Material

- Floor space

TO DO

- Lie down on the floor with a child and assume the same position as the child.
- Then let the child do different movements and poses, and try to imitate them.

OBSERVATIONS

- Does the child noticed that you are imitating her/his?
- Does she/he seem to be getting pleasure from this fact?

MORE IDEAS

- Let the child do something with an object like ball or toy and you try to make
- Exactly the same thing happens. Involve other children in this game of Imitation to make it a social experience.

EMERGING

- This is tremendously empowering to young children, especially children with motor
- Challenges. They are the boss. They are making turns. After they do something, they have
- To wait for you to do it. Then it is their turn again.
